HARA SAMEERAJ KUPPILI

Security-Focused Software Engineer · Data Privacy & AI Security · Full Stack Developer

Chennai, India | +91 90631 27578 | harasameeraj.7@gmail.com | LinkedIn | GitHub | Credly

SUMMARY

3rd-year Computer Science undergraduate at VIT Chennai focused on **secure software and data privacy**. Two full-stack internships shipping production apps with **role-based access control, Row-Level Security and hardened APIs**, plus an AI platform that automates **third-party vendor risk assessment**. Hands-on with authentication, encryption, OWASP Top 10 and threat modelling; uses Python and AI/ML to automate security work. **5× hackathon winner**, Cisco Introduction to Cybersecurity certified, eager to grow as a cybersecurity engineer.

TECHNICAL SKILLS

Security	Data privacy & PII redaction (DLP), secure auth (JWT, scrypt, CSRF, rate limiting), RBAC & Row-Level Security, AES-GCM encryption, threat modelling, OWASP Top 10, third-party risk (TPRM), OSINT
Languages	Python, JavaScript / TypeScript, SQL, Java, C++, C, Bash
AI / ML	Scikit-learn (classification, precision/recall/F1 evaluation), NumPy, NLP/NER (spaCy, Presidio), OCR (Tesseract), RAG, local LLMs (Ollama), OpenAI & Gemini APIs
Development	FastAPI, Node.js/Express, REST APIs, React, Next.js, React Native, PostgreSQL/Supabase, SQLite, MySQL, MongoDB
Tools & Systems	Linux, Git, GitHub Actions (CI/CD), Docker, Pytest, TCP/IP, HTTP/TLS, DNS

EXPERIENCE

Full Stack Developer Intern — Qcerebrum May 2026 – Jul 2026

Orbit SchoolConnect · cross-platform parent–teacher mobile app Chennai, India

- Built a **two-portal mobile app** (React Native + Supabase) putting attendance, grades, homework and fees in one place.
- **Locked down student data** with role-based access and **Row-Level Security**: parents see only their own child's records.
- Shipped **real-time chat and push notifications** over authenticated channels, so updates reach every device instantly.

Full Stack Developer Intern (AI & Web) — Apex Techno Soft Dec 2025 – Apr 2026

VendorScan · AI vendor-risk intelligence platform Chennai, India

- **Automated third-party vendor due diligence:** enter a supplier, get a structured risk report in minutes, not hours.
- Designed **AI agents (GPT-4o + web search)** that turn adverse news, registries and reputation signals into risk findings.
- Hardened the FastAPI backend (validated inputs, isolated secrets) and cut fetch/parse latency by **40%**.

PROJECTS

Stitch ATS — AI Applicant Tracking System Winner · AWS VIT Chennai Hackathon 2026

Python, FastAPI, React, SQLite/SQLAlchemy, Gemini & OpenAI APIs, GitHub API · Live demo

- **Cut manual resume screening by 75%:** AI scores every CV against the job description, GitHub and LinkedIn in under a second.
- **Finds candidates automatically** by searching GitHub for developers by skill and location, then ranking and importing their profiles.
- **Protected candidate PII** with authenticated endpoints, server-side input validation and parameterised queries that block SQL injection.

AI Smart Patient Triage Winner · NIT Trichy Vortex'26 Feb 2026

Python, Scikit-learn, Node.js/Express, React, Recharts, JWT

- **Flags high-risk patients instantly:** a Random Forest model sorts patients into Low, Medium or High risk at **92% accuracy**.
- Live React dashboard for doctors with **JWT-secured logins** and session-scoped routes keeping clinical data private.

CERTIFICATIONS

- **Introduction to Cybersecurity** — Cisco (Oct 2026)
- **McKinsey.org Forward Program** (Dec 2025)

ACHIEVEMENTS

- **5× Hackathon Winner** at inter-college events
- **HackerRank Python 5★** · regular LeetCode solver
- **Open-source contributor** (GitHub Pull Shark)

EDUCATION

B.Tech, Computer Science and Engineering — VIT Chennai 2024 – 2028

Coursework: Computer Networks, Operating Systems, DBMS, Data Structures & Algorithms, OOP
